Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner contacted applicant's representative indicating that in having parentheses around "indicating a reading sensitivity" and "indicating latitude" which defined the S and L values recited in claims 22-26 it becomes unclear whether the information in the parenthesis is important/given weight. Examiner suggested removing the parentheses so it is clear these elements are given weight. It was agreed the parentheses would be removed and replaced with commas through an Examiner's Amendment.
